A Series General Purpose Pumps

General Purpose Pumps for Pressure Lubrication, Hydraulic Service, Fuel Supply and General Transfer

The Roper Pump Family of Gear Pumps

		Typical Applications	Primary Features
	3600	 Mix, circulate, and transfer viscous liquids Gasoline, asphalt, molasses Ink, roofing compounds, oils 	 Precise tolerances for maximum efficiency Direct drive or built-on gear reducers Bi-directional rotation* Configurations available for close coupled drive and close coupled hydraulic drive
	Z	Industrial applications requiring a special mechanical seal	 ANSI Flanges Many parts interchangeable with 3600 Series Direct drive or built-on gear reducers Bi-directional rotation* Configurations available for close coupled drive and close coupled hydraulic drive
	3800	 Oilfields including light & heavy crude oil Kerosene mixtures, condensates and hot oils 	 Sealed ball bearings Quadruple grease purged lip seals Helical gears for quiet operation Bi-directional rotation*
	Bulk	 Fuels, solvents, petrochemicals Residual fuel oils, molasses, resins Tankers, barges, process plants, refineries 	 Large ports (6" and 8" available) allow more efficient transfer of fluids Thru port design allows for lower inlet and outlet losses
	5600	 Hydroseeding Grouting, seal coating, oil and sand Wastewater, waste oil, sludge, slurries Brine, paper pulp, fertilizer feeds 	 Rubber covered gears Bi-directional rotation Abrasive applications; up to pea size particles
	A	 Pressure lubrication Hydraulic service General transfer applications 	 Operates at motor speeds Bi-directional rotation* Close coupled capability
	2835	 Roofing Compounds Molasses Feed Supplements 	Operates at standard motor speeds Large ports allow easier fluid entry Built-in relief valve
	V 🗾	 Hazardous liquid transfer "Zero leakage" applications due to environmental concerns Chemical and petroleum applications 	 Mag-drive, sealless design eliminates seal repair costs and down time C-face mount eliminates misalignment Bi-directional rotation and self-priming
	F	 Hydraulic power for lifts, machine actuation, fuel burners, and blenders General transfer of oil and petroleum fluids 	 2 inlet ports, 2 outlet ports allows multiple piping arrangements (except F150 - F300) High Pressure Range Maintain pump without pipe removal
	ROC	 Chemical processing Pharmaceutical industry Injection or transfer of acids & solvents 	 Stainless steel construction Bi-directional rotation* Mag-drive, sealless option (X5-03 only)
	9622	 Chemical and transport applications Corrosive liquid transfer 	 316SS Housing 17-4 PH SST Gears / Shafts Built-in Relief Valve
- Californ	PC	 Viscous, abrasive and solids-containing liquids Transfer of wastewater sludge, polymers, grouts, paints and adhesives 	 Pulsation free pumping High suction lift capabilities Ideal for shear sensitive liquids
			*Pump reconfiguration may be required.

A Series General Purpose Pumps

General Purpose Pumps for Pressure Lubrication, Hydraulic Service, Fuel Supply and General Transfer

Up to 59 GPM • Up to 300 PSI

Roper A Series pumps are adaptable to a wide range of applications pumping clean fluids, such as pressure lubrication, hydraulic service, fuel supply or general liquid transfer.

These pumps are designed to operate at standard motor speeds, with provisions for flange or foot mounting. The internal bearings are lubricated by the fluid being pumped. With only two moving parts, the pumps run quietly.

They are manufactured and assembled with close tolerances, and regularly tested to insure dependable performance. Factory assembled for clockwise rotation (facing the pump drive shaft end), most may be reassembled for operation with equal efficiency in a counter-clockwise rotation.

MATERIALS OF CONSTRUCTION

Standard Fitted	
Housing	Cast Iron
Gears	Ductile Iron* Hardened Steel**
Bearings	
Idler Shafts	Ductile Iron* Steel**
Drive Shafts	Hardened Steel
Optional Materials	
Housing	Ductile Iron***
Bearings	Iron, Carbon

*06 and larger sizes. **03 and smaller sizes. ***In 005, 01 and 02 sizes

FEATURES

- Designed to operate at standard motor speeds
- Bi-directional rotation

Quiet-Running Helical Gears

Accurate machining insures:

- proper meshing
- reduced friction and vibration
- quiet, efficient operation
- Iong life

Long-Lasting Bearing Surfaces

- Bearings are special wear-resistant, high-lead bronze. (Iron and carbon bearings are available.)
- Four heavy duty sleeve bearings give positive support to pumping gears and insure long, efficient service.

Precise, Rugged, Maintenance-Friendly Design

- All castings are cast iron.
- Precise manufacturing tolerances provide minimum clearances for maximum pumping efficiency.
- Large, hardened steel dowel pins insure positive alignment between the faceplate, case, and backplate.

THE LEADING FORCE behind liquids[™] since 1857

MECHANICAL SEAL (STANDARD)

Mechanical seals are for those applications where product leakage is unacceptable. The mechanical seal uses less power than the packed box and, under proper conditions, has a longer service life. It does not require adjustment. Our standard mechanical seal is an elastomeric bellows type seal, with a temperature limit of 212°F (100°C). Special fitting is available for higher temperature applications.

MECHANICAL SEAL (POSITIVE DRIVEN)

These are positive driven seals with a PTFE wedge, for use

where corrosive and/or viscous liquids are being processed.

eliminates leakage. These seals have a temperature limit of 450°F (232°C). Special fitting is available for higher

temperature applications.

Wedge construction of the secondary sealing element virtually

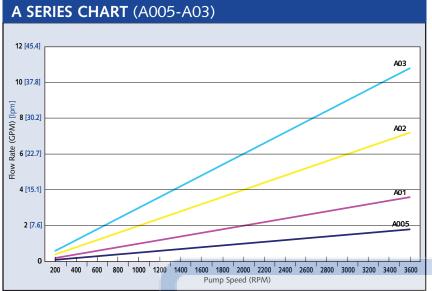

Pump Seals

The packed box seal is suited for general purpose applications. The standard packing has a temperature limit of 250°F (121°C), with special fitting available for higher temperature applications. The gland should be adjusted to allow slight seepage.

The lip seal is suitable for low pressure sealing of lubricating fluids. The standard seal has a temperature limit of 212°F (100°C). Special fitting is available for higher temperature applications. Available in CW rotation only and 100 psi maximum discharge.

Performance figures show maximum horsepower requirements for minimum rated gallons per minute at the various speeds, viscosities and pressures. The charts are intended as a guide for conditions at the pump. In determining the proper conditions of operation for the pump, many factors must be considered including inlet conditions, liquid characteristics, and temperature.

If there is any question concerning these charts or the recommended operating conditions, please consult your Roper distributor, district representative, or the home office.

AE Series Pumps

Low Pressure • Capacities to 130 GPM Pressures to 300 PSI

Roper AE Series pumps are well suited to applications where a compact and quiet unit is required, such as hydraulic lift applications. Bearings and wear-plates are special wear-resistant, high lead bronze. The pumping gears are accurately machined to run quietly and smoothly.

They can be operated at various speeds, depending on the conditions of installation.

THE LEADING FORCE behind liquids[™] since 1857

Roper Pump Company is a global supplier of high quality positive displacement pumps, designed to handle a broad range of industrial applications. In addition to helical gear pumps and progressing cavity pumps, we design and develop numerous custom pumps for customers with unique and demanding applications.

From a small pump company founded in 1857, Roper Pump Company has grown into a technological leader. With a large installed base, we have both the knowledge and experience to help you solve your most challenging pumping problems...and our strong global distribution network ensures that your needs are met on time, every time.

Our Markets

INDUSTRIAL

Roper Pump Company's rugged and dependable range of positive displacement pumps provides versatile pumping solutions for even the most challenging industrial applications.

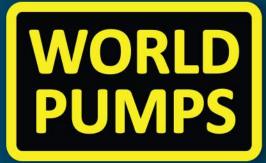

TRANSPORT With over a century of experience in liquid cargo transfer, Roper Pump Company has always been trusted to load and unload your tankers quickly and safely.

POWER GENERATION For reliable operation of engines, compressors and turbines, thousands of customers depend on Roper Pump Company fuel pumps, lube pumps and liquid fuel flow dividers.

OIL & GAS Roper Pump Company has numerous pumping solutions from the well to the refinery. Our industry leading DragonSlayer® Power Sections allow mud motors to run longer at unprecedented temperatures and depths.
